DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 16, 24**, are rejected under 35 U.S.C. 102(e) as being anticipated by Bucknell et al. (US patent Number 6,865,387 B).

Regarding claims 16, 24, Bucknell teaches a method of transmitting signaling and data in a wireless communication network, comprising:

receiving a first message from the wireless network for reconfiguration of uplink and downlink physical channels for a physical layer (col 3 lines 15-25); Bucknell discusses communication in cellular system. Bucknell discloses sending a first message to a wireless device for reconfiguration of uplink and downlink physical channels for a physical layer (see abstract lines 1-12, col 3 lines 45-50, col 4 lines 27-37, col 3 lines 23-25, col 4 lines 16-27, where Bucknell discusses a reconfiguration message for reconfiguring the air interface, thus uplink and downlink. Bucknell discloses performing synchronization to establish the downlink physical channels (col 4 lines 62-67, col 5 lines 1-22, where bucknell discusses the wireless device establishing the interface and sending an error message on the old uplink or an

acknowledgment on the new uplink). Bucknell discloses receiving a second from the wireless device indicating that the downlink physical channel has been established by the wireless device indicating that the downlink physical channel has been established by the wireless device (col 4 lines 43-49, where Bucknell discusses the mobile sending a second message to the wireless network indicating completion of the synchronization for the downlink physical channels by sending a response with duration. Bucknell discloses delaying transmission of signaling and data on the uplink physical channels, except for transmission of designated messages, until the indication is received from the wireless network (see col 4 lines 42-67, and col 5 lines 1-30, where Bucknell discloses the network waiting a certain time for the mobile to reconfigure based on the second message)

Allowable Subject Matter

3. **Claims 1-15, 17-23**, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments with respect to claims 16, 24, have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Any responses to this action should be mailed to:
